Description

A beautiful very high quality Indian solid silver card case. It is unmarked but tests as high grade silver. I would date it to c1890 almost certainly made in the Kutch region. It is in superb condition being free from dings holes and repairs, the lids fits tightly, the inside is clean. It measures a touch over 3 inches (7.8cms) by almost 2 inches (4.8cms) by 1.3cms thick (you can have cards made to any size). It weighs an impressive 91 grams. A superbly designed beautiful example.
