Depth = 15 cm (5.9")

Description

Really super quality and in great condition is this 12" fusee dial wall clock by Hall or Dover, circa 1820 and with a dome glass and brass bezel, keeping very accurate time. The dial has Roman Numerals and being a fusee, just the one winding point as this clock doesn't chime, but does have a lovely mellow "tick tock." As you can see from the interior photos, the clock has been well looked after, cleaned and oiled so will provide many many years of good time keeping. Measuring: 14 inches or 35.5 cm maximum diameter 12 inches or 30.5 cm dial diameter 6 inches or 15 cm depth
