Depth = 23 cm (9.1")

Description

A handsome early 19th C longcase clock by Richard Alexander of Chippenham, Wiltshire. He is listed as working there from 1795 to 1848. The nice slim case is in beautifully figured mahogany with boxwood stringing. The good quality 8 day movement strikes the hours on a bell. It has a very smart painted dial with subsidiary seconds dial, date indicator and displays the phases of the moon to the arch. The case is in excellent condition and a lovely colour. The movement looks to have been recently serviced, is in good working order and keeping good time. Free local delivery and set up (60mls), national and international delivery arranged at cost.
