Description

1930s Swiss pocket watch and chain. The watch has a Swiss seven jewel stem-winding movement which is working nicely. The movement is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is nickel and it is in good condition, just light surface marking and a couple of "dings" to the back but nothing too serious at all. The acrylic lens is in good condition. The dial is in lovely condition with blued steel hands and a subsidiary seconds dial. The watch comes with a double chain, more golden in colour than the watch but they came to us together, so it only seems right to keep them as one item. The watch and chain come in a new presentation box.
