Antique Phenix pocket watch and chain

Price

Sold**Item Reference: SA1011505****Date of manufacture: 1920**

Description

Antique Phenix pocket watch and chain. The watch has a 15-jewel stem-winding movement, probably by Phenix, which is working nicely. The movement is protected by an inner hinged cover. There is a little scratching to this inner cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is gold filled and it is in very nice condition. The watch has a glass lens. The main face has the odd minor mark and there are a few little chips on the bevelled edge but overall very acceptable. The dial is in nice condition with blued steel hands, a subsidiary seconds dial and outer minute markers. The watch comes with a double chain, each chain measures 22cm long including the T-bar and the clasp. The watch and chain come in a new presentation box.
