Description

This is a fabulous example of a vintage mens watch made by the premium Swiss make Omega. This is the rare solid 14ct Rose gold Seamaster Bumper Automatic with Chronometer rated calibre 343RG movement. Model reference number 2518 An Omega "bumper" is a vintage Omega that has a "bumper" automatic movement rather than a full rotation rotor automatic. The oscillating weight makes a partial rotation before "bumping" into a cushioning spring. The dial has been professionally restored to as new condition. It measures 34.5mm in diameter excluding the winding crown. It has the Omega logo on the crown and a matching rose gold Omega buckle. It is fully marked Omega on the dial, movement and case as you would expect. The case has been ultrasonically cleaned and polished so it is absolutely pristine. The chronometer movement is adjusted to 5 positions and temperature, it has just undergone a full overhaul and as you can see from the Timgraph trace is working easily within original Omega specification. The serial number on the movement dates this watch to 1950. Omega are one of the most exclusive watchmakers in the world and this watch certainly has that understated elegance ...
