Description

The night watchman would have depressed the lever on the top of the clock to show that he had visited a location. This in turn will depresses a pin on the outer chapter ring of the dial, readable over the next 12-hour period through the gap surrounding the dial. Multiple pins may be depressed, one each time he visits. With the initial design of these clocks, the boss would check the pins depressed to make sure the chap was doing his job right, over a 11-hour period. Passing strike on a bell. The maker of this clock. DENT COCKSPUR ST LONDON. DATE C 1840 very famous maker in the clock world. fusee movement (chain).
