Item Reference: SA1021624

Date of manufacture: 1930

Description

This is a remarkable Museum quality unrestored example the very rare Omega 20F Art Deco from 1930. The only work we have carried out is to service the movement, replace the glass and give the case a light polish. The curved solid 9ct rose gold case is 22mm by 38mm excluding the original crown, a full size gents. The movement is a calibre 20F which is quite rare and very high quality this was Omegas highest grade movement of this period. It has been freshly serviced and is currently running at plus 10 seconds per day, not bad for a 90 year old watch. The decorated and etched Art deco dial is totally original with just a few marks to show its age. The hands are a beautiful peacock blue. The 9ct gold case is very unusual with a very subtle soft rose tint, its not Rose gold but also not pure yellow. Its a colour of gold used exclusively by Omega up until the 1950s. Its the most original example you will ever see. As you would expect the watch is fully marked on the dial, movement and case. A museum quality collectors piece.
