Description

A rare solid silver coin cased magnifying glass. It has been superb made with the case being made from a 5 francs coin dated 1870 although I would date it to c1920-1940. It is in superb condition being free from dings splits distortions and repairs. It measures approx. 1.5 inches (4cm) across closed by 3 inches (7.6cm) open and weighs 38 grams. A very well designed piece.
