Description

A rare and beautiful Ancient Viking Spiral Bronze Ring 800-1200 AD, discovered in Finland. This ancient ring has been part of a private collection of Viking artifacts for many years. It is in fine condition and ready to be worn with care. Its exquisite craftsmanship and rich historical significance make it highly desirable. The ring features a lovely deep copper patina, a result of the high copper content used in its creation. UK size "W", 20.7 mm Diameter
