Sold**Item Reference: SA1032341****Date of manufacture: 1910**

Dimensions

Height = 7 cm (2.8")

Width = 14.6 cm (5.7")

Depth = 14.6 cm (5.7")

Description

Always very popular and a very useful desk-top accessory, this one is larger than the average size, quite an imposing size. These large circular magnifiers actually are the condenser or magnifier from a Magic Lantern dating to around 1910; they are rescued, polished up and put back to use in the modern day. This one is made from polished brass and is excellent quality, un-marked but probably by Optimus. The top of the glass is domed, always more sought-after than the flat lenses. Wonderful condition, with a good magnification and a hefty piece to keep those papers in place. 5 1/2" in diameter x 2 3/4" high. Item: 44077 FREE Worldwide Registered Airmail Directly From the UK

Internal Ref: 44077
