Gents Roamer Mustang Rotodate wrist watch

Price

Sold**Item Reference: SA1037983****Date of manufacture: 1960**

Description

Gents Roamer Mustang Rotodate wrist watch. The watch has an automatic movement, calibre 471, which is working nicely. The watch measures 35mm wide and 36mm high excluding the lugs. The case is stainless steel. It has general light surface marks but overall is in good condition. Original signed Roamer winding crown. The back of the watch is signed with the raised Mustang name and horse logo, together with details of patents relating to the design of the case. It also states that the watch is waterproof but, as with any vintage watch, it should be kept away from water and moisture. The lens has the odd small mark, not overly noticeable to the naked eye. The signed dial is in its original finish with original hands, centre seconds hand and date display. This is a quick form of quickset date where the hands are moved repeatedly backwards and forwards between 12 midnight and 9pm until the desired date is reached... the design of the recessed crown makes this a little fiddly so you could just wind the hands forwards to the desired date. The watch comes on a stainless steel bracelet which currently fits an 18cm wrist; there is capacity onto the clasp to make it around...
