Regency rosewood console table of small proportions

Price

Sold**Item Reference: SA1040667****Date of manufacture: Regency**

Description

An elegant Regency period rosewood console table of small proportions; the concave shaped top crossbanded in rosewood raised on sinuous scrolling supports decorated with turned paterae which terminate in a quatroform base and raised on crisply carved lion paw feet. This is probably the prettiest console table that I have owned. I love it scrolling supports which seem to form a lyre shape and its small scale make it the perfect hall table for a city apartment.
