Description

A stunning pair of cloisonne vases with silver mounts, worked in Musen (wireless enamel) and standard wired enamel. These vases are of the highest quality and although a little late, were made when the use of wireless enamel was at its peak. The wired enamel temples are more pronounced having a musen image of Mount Fuji as a backdrop, the design works beautifully. Silver mounts top and bottom and stunning condition. Signed with Ando seal and marked silver. Taisho period.
