Description

This is a near mint untouched and unrestored example of a 1967 Omega Seamaster Automatic Daydate gents wristwatch. The watch is the top of the range Seamaster Daydate with the calibre 752 automatic movement with quick set date. This is one of the best automatic movements ever made. This is an amazing unrestored example of this iconic Omega. All of the edges are clean and sharp, it has never been polished or restored, even the glass is original and in perfect unmarked condition. The original silver dial is perfect, the only thing we have done is to service the movement and give the case a thorough ultra sonic clean. The movement has just been serviced and comes with a 1 year warranty. As you would expect the watch is fully marked on the dial, movement and case. The watch case is oversized and measures 36.5mm in diameter not including the crown. The largest Pre 1970s golden age Seamaster model. We can fit any colour or style of strap we keep most things in stock. It clearly has been seldom worn and a superb collectors piece. Overall this watch is in superb original condition and an absolute must for Omega collectors. The watch has been fully serviced by and is guaranteed...
