Item Reference: SA1061941

Date of manufacture: 1930

Dimensions

Height = 13.5 cm (5.3")

Width = 32 cm (12.6")

Depth = 15 cm (5.9")

Description

This very well engineered and constructed scale model of a 17th century cannon is made from mahogany throughout its carriage and the wheels and fitted with bronze and steel mounts. The rotating wheels have hand turned spokes, steel rims and wooden hubs with bronze pegged collars. The barrel is finely cast in solid bronze which is held in place with steel hinged plates, one to each side. Throughout its construction, this is a very well made model which would be an interesting addition to any collection or could be enjoyed as a stand alone object for a desk table or shelf. It is in good condition, displaying some age related marks and patination. English circa 1930 Height 13.5cm x width 32cm x depth 15cm
