Date of manufacture: 1890

Dimensions

Height = 26 cm (10.2")

Width = 18 cm (7.1")

Depth = 16 cm (6.3")

Description

Hi I have for sale the most beautiful fully restored solid brass French oval crystal regulator mantel clock in great original condition with an eight day movement striking on a bell and made in Paris by Samuel Martis 1880. The Case The case is in solid brass the clock is very heavy standing 26cm high x 18cm wide with a depth of 16cm it is in very good original condition and has been very well looked after over the years, with thick bevelled convex glass on all four sides all in original condition. The Dial The dial is gilded with black Arabic numerals and has the slow and fast adjuster above numeral twelve. The Movement The movement is an eight day time and strike striking the hours and halves on a gong a real quality movement, which still retains the original key and pendulum. The movement keeps spot on time over the eight days; she was serviced and oiled around two months ago but fully restored with new springs just eight months ago so looking great in the case. The original key is still present. Overall a simply beautiful clock quite rare in this original condition that looks stunning on display keeping great time and looking even better. The photos do not do justice...

Internal Ref: Clive Oval 4 Glass
