Depth = 11 cm (4.3")

Description

Hi I have for sale the most beautiful small fully restored solid brass French crystal regulator mantel clock made in France around 1900s. The Case The case is in solid brass standing 23cm high x 13cm wide with a depth of 11cm it is in very good/perfect original condition and has been very well looked after over the years, with mint thick bevelled glass on all four sides. The Dial The dial is in white porcelain all set off with black Arabic numerals and ornate hands. The dial again is in original condition never restored and 100% original. The Movement The movement is an eight-day time and strike striking the hours and halves on a small sweet gong and keeping great time just having been fully serviced. The time is regulated by a mercury tubed pendulum. Overall a simply beautiful clock in this original condition that looks stunning on display. I will post or arrange delivery at a small cost the clock is too good to be damaged.
