Dimensions

Height = 24 cm (9.4")

Width = 10 cm (3.9")

Depth = 9 cm (3.5")

Description

A 17th century English lantern clock by Thomas Dyde of London. A rare, very small example standing only 8 3/4" tall. A well engraved dial and surmounted by a cast bell. Side and rear opening doors and standing on turned feet. A later carriage clock type mechanism has been adapted to the clock (originally it would have been a weight driven mechanism). This strikes the hours on the bell and is of 8-day duration. Thomas Dyde of London is documented in Loomes 'Lantern Clocks & Their Makers' book as working from 1662 and died in 1686. He was born in Worcestershire in 1635. It is a great pity that it does not retain the original mechanism but this is still a chance to obtain a 17th century clock in a very original case at an affordable price. Height 8 3/4" / 24cms Width 4" / 10cms (inc. chapter ring) Depth 3 1/2" / 9 cms From Kembery Antique Clocks Ltd you can expect a genuine antique clock with a written 12 month guarantee which has been serviced to a high standard.
