Depth = 27 cm (10.6")

Description

A fabulous English mahogany carved Aneroid barometer in excellent condition by the English watchmakers Mason & sons. A handsome barometer with its original brass bezel glass door covering its wonderful etched metal dial sitting below glassed thermometer. Like all antiques there are some imperfections however nothing can diminish from the overall look of this striking item. This is a decorative barometer that will adorn any wall and couldn't get the weather any more wrong than today's weather reporters. An aneroid barometer is a type of instrument used to measure atmospheric pressure.
