Dimensions

Height = 218 cm (85.8")

Width = 52 cm (20.5")

Depth = 25 cm (9.8")

Description

A fine example of a west country longcase clock by John Compton of Calne (Wiltshire). He is listed as working there from 1795 to 1830. The good quality case is veneered in beautifully figured mahogany with ebony detailing. The hood is nicely carved and has smart ebonised columns with gilt brass corinthian capitals. The top is mounted by 3 brass ball finials. The trunk door has retained its original lock and key and it stands on its original bracket feet. The 8 day movement strikes the hours on a bell and has a very smart painted dial. It has a subsidiary seconds dial and date indicator. To the arch is a dial displaying the phase of the moon. The case is in good original condition and is a nice colour. The movement is in good working order with all functions working as they should and keeping good time. Free local delivery and set up (60mls), national and international delivery arranged at cost. The height detailed below excludes the centre finial, if fitted this adds 14cm to the height
