Solid Silver Pocket Telescope Magnifier Folding Sterling

Price

Sold**Item Reference: SA1067584****Date of manufacture: 1800**

Description

Solid silver pocket magnifying loupe / telescope, circa 1800. Similar devices were made by John Dollond of London. A large lens and smaller sample platform (lens) with finger ring at one end. Smaller lens with original black frosted glass edge, now partly worn. The platform, a negative lens, has the dual function of acting like the first lens of a simple telescope. The oblong section frame with slide out bed for focusing. Large 30mm diameter front lens, smaller lens 16mm diameter. Magnification approximately 2.5x. 2,5/8" or 67mm long extended. All in excellent condition and good working order.

Internal Ref: 240508
