Description

A hard to find mid 18thc brass candlelabra, with double removable candle holders....they simply slot into the main stem of the candlestick....it is beautifully decorated with punchwork floral decoration to the main body and the shaped border around the two candle holders is mirrored in the shaped border of the base, which is very pleasing as you can match the candleholders with the main body of the candlestickboth the main body and the two sconces are seamed as you would expect for their age and it is in very good condition with a natural colour. French. C1740-60.
