Description

A rare Edwardian brass cased marine barometer made for the U.S signal service c.1900. The dished brass case with hanging loop to the top and matching brass bezel to the front. Skeletonised rapid indicating aneroid movement with porcelain dial set around the outer edge, marked British made and 'U.S signal service' to the bottom half of the dial (U.S signal service is a branch of the United States army that controls communication and information services). Quarter plate bevelled edge glass to the front with central reading marker. Presented in superb original condition with a deep shine, fully serviced and working. Keep up to date via Instagram - sturmansantiques. Measures 5.25" diameter x 6.75" high including hanging loop x 2.25" deep. Postage and packing cost (tracked and insured) for this item is £14.00 for mainland UK. Please contact us for delivery abroad.
