Depth = 19.5 cm (7.7")

Description

This is an antique field telescope. An English, brass terrestrial and astronomical 'Starboy' tripod mounted refractor by Broadhurst, Clarkson & Co, dating to the early 20th century, circa 1920. Perfect for bird watching, landscape appreciation, wildlife stalking, or maritime observation. Equally suitable for observing the night sky. Impressive Starboy model, replete with a superb tripod and accessories in a quality case. Displays a desirable aged patina throughout. Striking brass brightwork presented in eye-catching, original order. Body unmarked as such, but almost certainly by the renowned Broadhurst, Clarkson and Co. of London. Being a terrestrial model, the image is displayed 'right way up' through the eyepiece. Large 3.25" primary objective lens affords a bright image through the scope. Single draw tube extends smoothly, focused by knurled wheel moving an internal rack and pinion. Spotting scope parallel to the barrel, with crosshair reticule. Supplied with a parallel viewing tube, accessory eyepieces and period information sheets. The above accessories fit neatly within the locking case — key present. Broadhurst maker's mark to the 'Star Diagonal' angle viewer and Comet...
