## Description

This is a large petrified wood specimen, a stunning relic of the distant past, polished to perfection and mounted on a bespoke stand. Its age is estimated to be between 120 - 240 million years old, hailing from the Triassic period. This decorative piece of natural history is not just a conversation starter, but a tangible connection to the earth's ancient history. It displays attractive smoky tones that add a touch of mystery and allure. The specimen retains its original petrified bark, a testament to the remarkable process of petrification that has preserved it for millions of years. The specimen's timeless beauty and intriguing origins make it a superb addition to both antique and contemporary interiors. Whether it's placed in a study, a living room, or a personal library, this piece will undoubtedly draw attention and spark curiosity. In essence, this large petrified wood specimen is more than just a decorative piece - it's a slice of the earth's history, polished and presented for you to appreciate and enjoy. Height: 10 1/2 inches (27 cm) Width: 10 1/4 inches (26 cm) Depth: 1/2 inches (1.3 cm)

Internal Ref: SA246
