Description

A very rare solid silver tea cup and saucer. It is hallmarked with a 84 silver standard mark and tests as such. I would date it to c1920-1940. It has been superbly designed and is in superb condition being free from dings splits and repairs, a few small black spots. The cup measures approx. 3.5 inches (8.8cm) across the cup excluding the handle by almost 2 inches (4.8cm) to the rim tall and the saucer 5.5 inches (14cm) across and combined weighs 176 grams. A beautifully made piece.
