Sold

Item Reference: SA1089327

Date of manufacture: 1960

Description

Gents Omega Constellation automatic chronometer wrist watch, 1966. UK POSTAGE ONLY FOR THIS ITEM
The watch has a 24-jewel calibre 712 automatic movement which is working nicely. The movement is fully signed and it has the serial number 23,653,761 which dates it back to 1966. The watch measures 33mm diameter excluding the winding crown and the lugs. The case is stainless steel and it is in lovely condition. The back cover has the observatory image and the eight stars which represent Omega's greatest chronometric achievements at the annual observatory chronometer tests between 1945 and 1952. The inside of the screw-on case back has the Omega logo together with the case reference 167.021 which is correct for the calibre 712 movement. Omega signed winding crown. Omega lens with the tiny clear Omega logo to the centre. There is a little marking to the dial but really only visible through a jeweller's loupe. Reflection showing in the photos. The signed dial is in good original condition with original hands and centre seconds hand. A new leather strap has been fitted. The watch comes in a vintage Omega presentation box.
