Description

This stylish French pencil drawing from the 1930s epitomizes the period in which it was drawn. The artist certainly knew their craft, as they have created a very eye-catching layout, so much so that it's difficult not to be drawn towards this work on paper. There is some handwritten notation in French above the design which includes the date of 30th November 1930. It's being sold unframed, but we will happily discuss and undertake the representation of this interesting artwork if so desired.
