Dimensions

Height = 42.5 cm (16.7")

Width = 13 cm (5.1")

Depth = 13 cm (5.1")

Description

A very good quality late Victorian brass Corinthian column table lamp by J Hinks & Sons. J Hinks & Sons had a foundry in Birmingham from 1835 and were responsible for the vast improvements to oil lamps, patenting the duplex burner for petroleum based lamps. Their trade stamp is associated with all quality lighting from that period. This impressive lamp with stepped base leading to Corinthian column and capital measures 42.5 cm in height to the top of the bulb holder. A good heavy example; the cast iron base with manufacturer's stamp to the underside J Hinks & Sons and model number. In excellent condition throughout, professionally polished and fully rewired in period style braided flex and PAT safety tested.
