Dimensions

Height = 221 cm (87.0")

Width = 51 cm (20.1")

Depth = 25 cm (9.8")

Description

A handsome Geo III Longcase clock by Thomas Shindler of Canterbury. He is listed as working there from 1747 to 1797. The case is in nicely figured mahogany and is a good colour. It has a long moulded trunk door and a double plinth base. The arched hood has reeded columns with brass capitals. Both the hood and trunk doors have working locks and keys. The good quality 8 day movement strikes the hours on a bell. It has a very smart silvered brass dial that is nice and clear and is signed to the arch by the maker. The case is in good condition but being over 200 years old it does have the odd signs of age and use as shown in the pictures. The movement is in good working order and keeping good time. Free local delivery and set up (60mls), national and international delivery arrange at cost
