Gents 1950s Helvetia automatic wrist watch

Price

Sold

Item Reference: SA1098461

Date of manufacture: 1950

Description

Gents 1950s Helvetia automatic wrist watch. The watch has a good quality 28-jewel Helvetia calibre 838 automatic movement which is working nicely. As with many Helvetia watches, the watch is wound anti clockwise to charge up the automatic movement. The watch measures 34mm diameter excluding the original winding crown and the lugs. The case is stainless steel and it is in lovely condition. The case back states that the watch is waterproof but, as with any vintage watch, it should be kept away from water and moisture. The lens is in lovely condition. The signed dial is in its original finish with original hands and centre seconds hand. There is some light freckling across the dial. The watch has a vintage leather strap although we can fit a new strap if preferred. The watch comes in a new presentation box.
