Width = 8 cm (3.1")

Depth = 7 cm (2.8")

Description

Hi I have for sale a 1960s carriage clock made by L Epee in France that is in old shop stock condition I believe never used, keeping good time over the eight days signed on the dial by L Epee and on the rear of the movement by the maker L Epee France. The case and movement are totally untouched and original a small service added only so the clock is gleaming away in the sunshine. The Case The case is in solid heavy brass in the Dolice case style standing 15cm high x 8cm wide with a depth of 7cm it is in perfect condition with mint bevelled glass sides/front/back door and top viewing glass. The case has been buffed up and is gleaming. . The Dial The dial is in mint perfect original condition in white with the original black moon hands and Roman numerals and signed by L Epee. The Movement The movement is an eight-day time only; the movement has been serviced so keep great time over the eight days via the original jewelled escapement to the top. The movement is signed by L Epee to the rear with their sign stamped in and the serial number stamped in. I have a key for the clock that's included. Overall a very heavy quality carriage clock by a quality maker that looks stunning.

Internal Ref: Clive L Epee
