**Sold**

**Item Reference: SA1106023**

**Date of manufacture: 1900**

## Description

Antique silver Omega pocket watch, 1902. The watch has a stem-winding movement which is working nicely. The movement is signed with the early Omega logo underneath the dial and it also has the serial number 2,418,344 which dates it back to 1902. It also carries the brevet (patent) number 8760, for an 1895 patent registered by Louis Brandt (of Omega) regarding the improved winding stem function. The movement is protected by an inner hinged cover. The watch measures 45mm diameter excluding the winding stem and the loop. The case is 935 silver and there are Continental hallmarks inside both of the case backs. The case has a little unevenness to the back but nothing too serious. The glass lens is in good condition. The dial has a faint hairline starting between 12 and 1 but you have to look closely to see it. The watch comes in a new presentation box.
