Price

GBP 9,250

| USD \$12,517 | EUR 10,823

Item Reference: SA1106587

Date of manufacture: Regency

Dimensions

Height = 208 cm (81.9")

Description

A very unusual Regulator longcase clock with deadbeat escapement and maintaining power. Also featuring brass covered weights, a huge Regulator pendulum with a wooden rod and striking the hours on a bell. The dial also features seconds, date and a very useful strike/silent mechanism below number XII. The case has a very modern design to the top of the glazed trunk door and is veneered with high flame and crossbanded mahogany throughout. Also with ebonised mouldings and inlay. C.1810 Please Note: Although currently in working order the movement will require a full overhaul and service before delivery.
