Item Reference: SA1107337

Date of manufacture: 1920

Dimensions

Height = 11 cm (4.3")

Width = 29 cm (11.4")

Depth = 15 cm (5.9")

Description

A good example of a small brass microscope dating from the early 20th Century, complete with a stacking objective lenses and two eyepiece lenses. The microscope itself is made of brass and is a typical design with a tubular body. There is a rack and pinion focus on the rear of the tube and the top part of the tube can also be extended to provide a finer focus. It has a square stage with a mirror below to direct the light and a revolving pin wheel. It has a heavy Y-shaped foot painted in a green coloured paint. The microscope appears to be in good working order and I have set it up and tested it with a few old slides. I'm sure the lenses would probably benefit from a clean but they produced a clear image all the same and the microscope was easy to focus. Overall the microscope is in good condition for its age. It has been used and will have normal signs of wear. The brass has tarnished and the lacquer has worn in places but there are no major damages or dents and it displays well. Although in working order it is really being sold as a decorative / collectors item rather than an accurate scientific instrument. The microscope comes with its original wooden fitted box. Th...
