Description

What a beautiful and rare carpet, around 200 years old! I purchased this recently from an estate in France and what a terrific 'look' it has. The faded dyes, the large 'Afshan' design and the very unusual 'Mina Khani' border design- more commonly found as a field design- means this carpet has more in common with rugs you'd find in museums than not. From North West Persia circa 1820. In as found condition, meaning there are some small holes, and it is dusty. Priced as it is. 8'3" x 18'6"
