Description

A fine example of a mid 19thc fruitwood game called "pigs in clover", consisting of three concentric fruitwood rings fixed to a wood base..... the game challenges players to drive pigs (wooden balls) through clover (the outer rings) and into a pen (inner ring) which is in the centre, without physically touching the wooden balls....you can also keep adding to the number of pigs, to make it more difficult.....this is a lovely game to play with the grandchildren, who have often said to me after playing the game...."it is better than any computer game" , high praise indeed...!! the game is in excellent condition, with a fine natural colour....and ideal to play at Christmas....! English. C1840-60.
