Description

This is a superb antique patinated bronze Equestrian Statue of Napoleon Bonaparte, circa 1870 in date. This stunning patinated bronze statue portrays the French leader in his typical uniform - wearing a bicorn hat, epaulettes, chivalrous orders and military decorations, waistcoat, sword and knee-high boots - while riding his horse, Marango, with his right-hand arm raised upward in the act of commanding. The horse is moving with the two front legs raised conveying a great sense of movement. The figure of Napoleon is extremely life-like as much as to convey the idea of a strong military leader, emanating power and energy. It is raised on a magnificent foliate parcel-gilt bronze and sienna marble stepped rectangular plinth with a large bronze laurel wreath. This high-quality hot cast solid bronze was produced by using the traditional "lost wax" process, otherwise known as the "cire perdue" method. The craftsmanship is second to none throughout all aspects of this bronze which is sure to add an unparalleled touch of class to your home. Condition: In excellent condition, please see photos for confirmation.
