Description

19th Century Human Medical Natural History Skull Example A heavily patinated example of a mid-19th century human medical natural history skull example. With cranium attached brass hooks as shown. The front teeth are missing, and the jaw is detachable and not fixed to the mandible. Size in inches: H 6 x W 5" x D 8" Origin: English Date: Mid- 19th century Condition: Aged A naturally aged item that has taken a lifetime to achieve, the front teeth are missing and the cranium once attached with the hooked sits back somewhat due to being loose hinged from the base of the skull. The mandible is not attached and come apart from the skull. This is a real artifact so please consider its age and import restrictions when purchasing into your country. We strongly suggest reviewing all the photos provided as part of this advert and propose questions where sections are unclear to avoid disappointment upon purchase. A direct message usually takes 24 hours to answer. For multiple years we have sold antique items globally, please review our client feedback as a testament to our products and services. Expect our items to show relevant age and natural wear, we only restore due to ...

Internal Ref: toothless skull
