Width = 3.2 cm (1.3")

Depth = 1 cm (0.4")

Description

A 1939 Omega, in a stainless steel case. This particular example is a real treasure, featuring an exceptionally rare copper-toned dial, setting it apart from more common variants of the era. The dial retains its original lume-filled Arabic numerals. Encircling the dial is a crisp outer minute track with 5-minute markers. Adding depth to the dial is the recessed subsidiary seconds dial at 6 o'clock in a contrasting 'sunburst' finish. The subdial is detailed with Arabic numerals placed at the quarters. The blue steel 'pencil' hands, featuring a central lume fill, perfectly complement the dial's copper tone. Dials of this unique colour and condition are incredibly scarce, making this watch a true gem for collectors and enthusiasts alike. A stainless steel case with integral bezel, stepped above the main case body. Shaped lugs extend from the case, each with a light chamfer. An early screw down case back with the script 'Waterproof, Modele Depose, Omega Swiss'. Case reference 127. The watch is powered by a 15 jewel Omega 26.5 SOB manual wind mechanism. The 9.0m serial number dates this watch to circa 1939. Case width (excluding crown) 32mm Case height 36mm Case depth...
