Depth = 25.5 cm (10.0")

Description

This is an antique 3 draw telescope. An English, brass and leather dressed refractor by Newton & Co, dating to the Victorian period, circa 1870. Perfect for bird watching, landscape appreciation, wildlife, or maritime observation. Equally suitable for observing the night sky. Pleasingly dressed example with fascinating markings. Displays a desirable aged patina throughout. Warm caramel hues to the lightly time-worn leather. Polished brass presents bright golden tones. Leather cups to each end protect the optics. Draws smoothly from within the primary barrel. Sliding sun shade encloses the generous 42mm objective (1.75"). Rear eye-cup hosts a sliding dust shield. Engraved to the barrel for Newton & Co with serial number 01185. Newton & Co occupied the address on Fleet Street from 1851. The British Military Broad Arrow (Pheon) over the Letter 'I' indicates its use in India. Supplied with a London Fine oak and brass Captains Stand for display. This is a smart antique 3 draw telescope, the Broad Arrow indicating its time served in India. Presented in fine antique condition, with a quality image. Delivered ready to enjoy.
