Depth = 18 cm (7.1")

Description

A good quality and highly original antique microscope dating from the mid 19th Century. The microscope parts are made of lacquered brass and it sits on a heavy horse shoe shaped base. The whole microscope tilts and it has a rack and pinion focus. It has a circular shaped stage with an adjustable slide holder. There are a set of tweezer grips on the side of the microscope to hold a specimen and below the stage is a large adjustable mirror and a revolving pinwheel filter. The microscope comes with a full set of lenses including 4 objective lenses in brass cases (1/4", 1/2", 1" and 3") and two eyepiece lenses. It also comes with a couple of other filters including a blue glass one and a prism shaped one. There is also an adjustable convex bullseye on a brass stand. The microscope comes in its original fitted wooden box with sections to hold the lenses and accessories plus a slide drawer. The box has a good quality brass carrying handle and is a strong sturdy box with a nice patina, although the lock is missing. The box measures approximately 15 1/4" (39cm) tall x 9" (23cm) wide x 7" (18cm) deep. The microscope appears to be in good working order and I have set it up and t...
