Description

Omega military pocket watch, 1943. The watch has a 15-jewel stem-winding movement which is working nicely. The movement is fully signed and it has the serial number 9,923,882 which dates it back to 1943. The watch measures 52mm diameter excluding the winding stem and the loop. The case is nickel plated and it is in good condition. The back of the watch has the military arrow, or pheon, together with the GSTP General Service Time Piece mark and store code. The acrylic lens has some nibbling at the bottom, not too detrimental at all. The signed dial is in lovely condition with original hands, they probably had infill originally but this has been removed over the years. The watch comes in a new presentation box.
