Depth = 76.2 cm (30.0")

Description

Huge Early 20th century English architectural pine model A well modelled early 20th century hand carved oversized pine architectural model. Showing natural age and minor loss as shown. This example would have been used to display what a finalised building structure would have looked like in concept form. The entire model is shaped and carved by hand using small nails and naturally bent wooden section to create this stunning form. Size in inches: H 29" x W 30" x D 31" Origin: London UK Date: Early 20th Century Item Condition: Aged This item is naturally aged with surface wear and loss. As it's made from hand carved sections of pine some of the detail has broken including certain top roof sections and roof edge areas as we have tried to show in the photos provided. Covered in a natural patina and stained in sections. A solid yet fragile example. Please review all the photos provided as part of this advert, close-up photos have been provided to show its condition of loss of surface detail and paper in more detail. We strongly suggest reviewing all the photos provided as part of this advert and propose questions where sections are unclear to avoid disappointment up...

Internal Ref: pagoda model
