Antique Hebdomas pocket watch and chain

Price

Sold**Item Reference: SA1139475****Date of manufacture: 1910**

Description

Antique Hebdomas pocket watch and chain. The watch has a stem-winding movement which is working nicely. The mainspring barrel is beautifully engraved and has gilt highlights. It also states that the watch has an 8 day movement in three different languages, English, French and Portugese. The watch measures 50mm diameter excluding the winding stem and the loop. The case is nickel and it is in good condition, just slight unevenness to the back. The acrylic lens is in good condition. The dial has an exposed balance and regulator synonymous with Hebdomas. The dial looks good to the naked eye... if viewed through a magnifying loupe there is a faint hairline running from number 12 down towards number 6. The watch comes with a single chain, 31cm long including the T-bar and the clasp. The watch and chain come in a new presentation box.
