Description

A fine example of a pewter "ships" inkwell, this form is known as a "capstan"....made for more stability as the ship crosses rough seas....it has a wide broad flat base and a cylindrical main body that is tapered from top to bottom with six quill holes in the top....it would have had a ceramic /glass liner which is missing, but otherwise in very good condition. English. C1770-90.

Internal Ref: MS 8298
