Antique Unusually Small Walnut Dial / Wall Clock Camerer Kuss W&H Working Order

Price

Sold**Item Reference: SA1148771****Date of manufacture: 19th Century**

Description

Antique Unusually Small Walnut Dial / Wall Clock Camerer Kuss W&H Working Order. This beautiful antique wall clock is of unusually small proportions for an example like this. The case is round to the front and made of walnut with a fantastic rich colour and grain. The back box is then also walnut with a door to the bottom so that the pendulum can be hung. The dial is then beautifully painted and set out in black Roman numerals. The dial is then finished by a protective glass set into the brass bezel as well as two lovely shaped fingers. The dial is unusually small being that it is only 7.5" in diameter. The movement is then wound from the front and accessed from taking out the pegs. The clock is complete with its pendulum and winding key and is in full working order. The movement is then stamped "W&H SCH" to show that the clocks movement was made by Winterhalder & Hofmeier. The case also has a label to the back and inside of the case to show that it was made by "CAMERER, KUSS & CO". It measures approximately: - 10" / 25.5cm Tall. - 10" / 25.5cm Wide. - 5" / 12.75cm Deep. - 7.5" / 19cm in Diameter Dial.
