Depth = 1 cm (0.4")

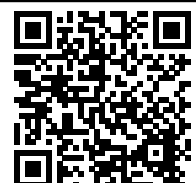

Description

This is a remarkable Museum quality unrestored example of the rare Longines Flagship automatic from 1961. The only work we have carried out is to service the movement and give the case a light polish with a soft cloth. The solid 18ct gold case is 35mm in diameter excluding the original crown, a full size gents. The case edges are sharp and crisp the watch looks like it was kept hidden away in a drawer and never worn. The movement is a calibre 340 very high quality this was one of Longines highest grade movements of this period. It has been freshly serviced and is currently running within original Longines specification. The dial is totally original and perfect it has had no restoration whatsoever. The hands are original matching gold and even the glass is original and perfect. The flagship emblem to the case back is perfectly detailed and crisp this is a watch that has hardly been worn. Its the most original and perfect unrestored example you will ever see. As you would expect the watch is fully marked on the dial, movement and case. It comes with its original box also in fabulous as new condition. A very rare museum quality collectors piece that can be handed...
