Depth = 4 cm (1.6")

Description

This is a fine antique Victorian sectional bone telescope walking stick, marked for the maker, Stanley of London, and dated 1885. The striking stick features a handle composed of a three drawer brass telescope on a tapering bone cylindrical shaft with a large original bronze ferrule. The telescope is 37cm long when fully extended. Add an extravagant element to your daily life with this wonderful walking cane. Condition: In good condition. As an antique item, the walking stick shows signs of use commensurate with age, these minor condition issues are mentioned for accuracy and, as seen in the accompanying photographs, it displays beautifully. Dimensions in cm: Height 92 cm x Width 14 cm x Depth 4 cm - Telescope closed Dimensions in inches: Height 3 foot x Width 5 inches x Depth 2 inches - Telescope closed Size of cane that you need Convert your height into inches. For example, if you are 5' 10" in your shoes, your height is 70 inches. Divide by two and then add ½ inch to determine your approximate cane size. In our example, if you are 70 inches tall (5' 10"), your approximate cane size would be 35" plus ½" = 35.5 inches. Our reference: A4589
